

Create Other Transactions Documents (Payroll Expenses).

Your Rating:

Results:

0 rates

Introduction

Use the **Create Other Trans. Docs (Payroll Expenses)** job, to view the **payroll cost** of your company's employees and transfer it to the Financials module. From there, you can track the total employee's cost, i.e. the expenses from the payroll module, but also from all the sections of the Commercial management (e.g. travel expenses, mobile telephony, vehicles, etc.).

The job massively creates **Other transactions documents** for the employees, the Insurance & Pension Funds (IPF or Funds) and the Tax office, including all the debits/credits set per Payroll element and Fund.

You will find it available:

- in the Jobs Menu H.R. & Payroll Payroll Period Jobs,
- in the Jobs Menu Financials Other transactions,
- through the Employees List, by right-clicking on an entry/ies, to run the job for specific employees.

- [Operation & Examples](#)

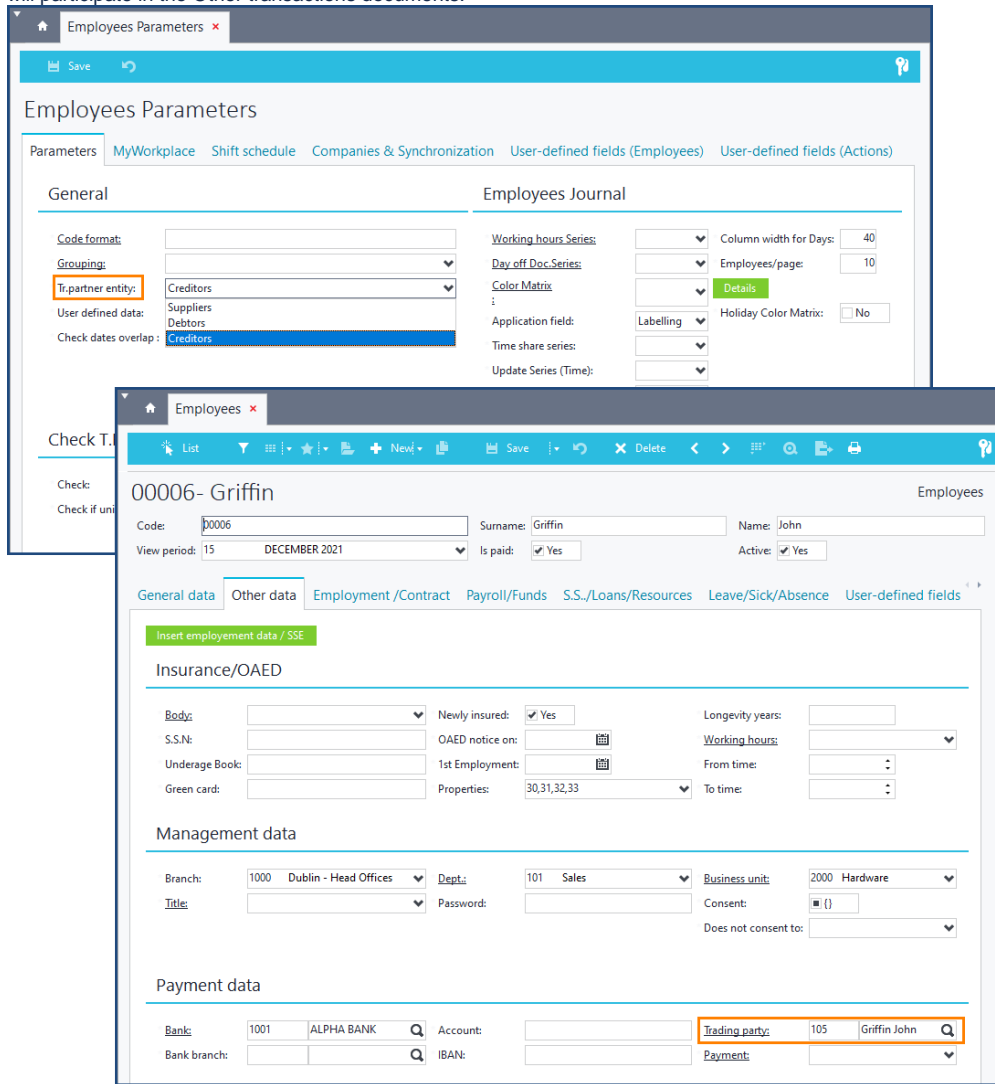

Configuration in Soft1

In short, the proper functioning of the job requires that:

- the employees, Funds and Tax Office, that participate in the creation of the documents, are linked to Trading parties.
- the proper debits/credits are set, in all the Payroll elements and Funds types involved in the creation of the documents.

In the **Employees Parameters** (Parameters C.R.M. Employees - Contacts) select the **Trading partner entity**, i.e. the type of trading party in which the employees' transactions will be monitored. For example, by selecting **Creditors**, the employees' documents created by the job, will be **Creditor other transactions**.

Next, you have to assign the Trading party (here Creditor) to the Employee, through the Employee's **Other data** tab. This will be the trading party, that will participate in the Other transactions documents.

2 Payroll parameters

In the Payroll parameters (Parameters menu H.R. & Payroll), set the **Expense document data**, that will be created by the job, i.e.:

- select the **Funds/Tax section**, i.e. the type of trading party in which the Funds' and Tax office's expenses will be monitored. For example, by selecting **Creditors**, the Funds' and Tax office's documents created by the job, will be **Creditor other transactions**,
- assign the **Tax office** to the trading party (here the Creditor), that will participate in Creditor other transactions. See how to assign the Fund to a Trading party in step 4,
- set the **Payable amount payroll elements**, e.g. the PE 3200 "Payable amount", the PE 3168 "Gross salary", e.tc. that will participate in the **employees'** Other transactions documents,
- set the **Taxation payroll elements**, e.g. the PE 3195 "Period tax amount", that will participate in the **tax office's** Other transactions documents,

Period payroll elements per employee

For each Payroll element you stated above in the Expense document data, you will need to set a **Debit/Credit**.

In the **Period payroll elements per employee** (Parameters menu H.R. & Payroll, Calculation parameters), select the Payroll elements, and define the Debits/Credits.

info!

 You can set the same or separate Debit/Credit per Payroll element. It is suggested that you use separate Debits/Credits, to achieve better results analysis.

Insurance & Pension Funds Types (Types - IPF)

In the **Types - IPF** (Parameters menu H.R. & Payroll Pension Funds), set the data that will participate in the Other transactions documents of the **Funds**, i.e.:

- the **Trading party**, e.g. the Creditor "Social insurance fund",
- the **Employee** and **Employer contributions** debits/credits,
- the **Total contributions** debit/credit,

- the **Other Employee/Employer Payroll Data**, e.g. the PE 3032 "Arrears deductions" etc. (Note that in each PE you select, a **debit/credit** must be defined.)

Operational scenarios

Before running the job you need to decide how you want the **Employees Payable** to be calculated and displayed in the expense documents, e.g.:

- only the **payable amount** of employees,
- **analysis of the payable amount**, i.e. an analysis of the expenses from the calculation of which the payable amount is derived (e.g. Gross salary, employer contributions, employee contributions, Taxes, e.tc.). This scenario could be suitable for agreement with the G/L Accounting entry.

1

Scenario #1: Calculation based on the employees net payable amount

First of all, in the Payroll parameters, you need to select the PE **3200 "Payable amount"**, in the **Payable amount payroll elements** field.

1. Select the **Payroll months** (payroll periods) and
2. the **Calculation date range**, based on which the employees' payable amount will be calculated.

(Activate the **Analysis into cost center**, in case you want the results to be calculated per cost center.)

3. Set the **Payable analysis** to **No**, to calculate the payable based on the PE **3200 "Payable amount"**, selected on Payroll parameters.
4. Select **Update from payroll calculation** and
5. **Run** the job.

View the employees' payable, on the **Payable (employee)** tab.

Job: Update from payroll calculation

Payable (employee) Fund contribution Tax on income

Code	Name	Cost center	Payable	Comments
103	Cungham Harry		489,38	Payable amount
105	Griffin John		1.319,82	Payable amount
107	Hanks Andy		1.116,30	Payable amount
108	Jacob Donald		522,61	Payable amount
111	MacKenna Thomas		478,89	Payable amount
104	McLoughlin Jacob		1.263,12	Payable amount
109	Reece Nick		1.890,47	Payable amount
110	Richardson Natalie		853,70	Payable amount
106	Whelan Margaret		890,31	Payable amount
			8.824,60	

In the **Fund contribution** tab, view in detail and per Fund, the contributions that correspond to the employee and the employer.

In the **Tax on income** tab, see the payable to the Tax Office amounts. In the example, the calculated taxes correspond to the payroll element PE 3195 "Period tax amount", selected in the Payroll Parameters.

Job: Update from payroll calculation

Payable (employee) Fund contribution Tax on income

Fund	Cost center	Employee	Employer	Comments
Y.K.A.		1.975,02	3.286,92	
Pension Fund		130,25	199,84	

Job: Update from payroll calculation

Payable (employee) Fund contribution Tax on income

Code	Tax office	Cost center	Tax	Comments
112	Tax office		1.245,94	
			1.245,94	

Issue the expense documents

Fill in the **Expense document data**.

Set the registration **Date** of the expense documents.

In the **Transaction series (Employees)/(Ins. & Pension Funds)/(Tax office)**, select the corresponding series, e.g. the Creditors Other transactions series, in case you have selected the employees, funds and Tax office to be Creditors.

Select **Issue documents** and **Run** the job.

Job results

The job creates as many Other transactions documents as the Employees, the Funds and the Tax Office, that have been calculated.

The Employees' and Tax office's documents include the debits/credits that correspond to the **Payable amount payroll elements** and **Taxation payroll elements**, selected on Payroll parameters.

The Funds documents include the debits/credits stated in the Types - IPF.

EMEX000014 - 31/1/2021

FCN000016 - 31/1/2021

TEXP000013 - 31/1/2021

Tip!

After issuing the expense documents, you can create payment wire transfers for the employees of your company (e.g. creditor wire transfers), either manually or in bulk, through the **Payments Plan (wire transfers)** job.

Finally, you can generate SEPA bank payment files in bulk, using the **Create SEPA file** job.

2

Scenario #2: Calculation with analysis of the employees' payable amount.

In this scenario, the functionality differs only in terms of the calculation of the Employees Payable and the way the expenses are displayed in the Other transactions documents.

First of all, in the Payroll parameters, you need to select the PE 3168 "Gross salary", in the Payable amount payroll elements field.

In the job, after you fill in the necessary fields (see scenario #1):

- Set the Payable analysis to Yes,
- Select Update from payroll calculation and Run the job.

View on the Payable (employee) tab, the employees' payable that resulted from the calculation below:

Gross salary + Employer contributions - Period Tax Amount - Total contributions

info!

In the Fund contribution and Tax on income tabs, the contributions to the Funds and the payable to the Tax office are calculated in the same way as described in Scenario # 1.

Tip!

Enable Analysis into cost center, by selecting Cost values only, to analyze per cost center only the payroll elements that are real costs to the company (e.g. Gross salary and Employer contributions).

Code	Name	Cost center	Payable	Comments
103	Cungham Harry		586,08	Gross salary
103	Cungham Harry		160,94	Y.K.A.
103	Cungham Harry		-257,64	Y.K.A.
105	Griffin John		-813,26	Y.K.A.
105	Griffin John		-224,93	Period Tax Amount
105	Griffin John		508,01	Y.K.A.
105	Griffin John		1.850,00	Gross salary
107	Hanks Andy		1.500,00	Gross salary
107	Hanks Andy		411,90	Y.K.A.
107	Hanks Andy		-123,67	Period Tax Amount
107	Hanks Andy		-659,40	Y.K.A.
108	Jacob Donald		-330,09	Pension Fund
			9.271,49	

Job Results

After you Issue the documents (see in scenario #1), the Other transactions documents of the Creditors, include the Debits/Credits, that were stated in the Payroll elements and the Types - IPF, i.e.:

- the debit/credit 55.00.00.0000 "Total contributions payable", stated in the Type of the Fund, in the Employee contribution field,
- the debit/credit 54.04.00.0000 "Taxes", stated in the PE 3195 "Period tax amount",
- the debit/credit 60.03.00.0000 "Employer contributions", stated in the Type of the Fund, in the Employer contribution field,

- the debit/credit 60.00.00.0000 "Employees Gross Pay", stated in the PE 3168 "Gross salary".

info!

The Tax office's and Funds documents are created in the same way as described in Scenario # 1.
